Cisco VPN Client Windows 10 - 442 Error

Support Team - 2024-05-10 - Comments (2) - Security

Cisco VPN on Windows 8.1/10 – Reason 442: Failed to enable Virtual Adapter

To fix:

1. Click Start and type ***regedit*** in the Search field and hit enter.
2. Navigate to ***HKEY_LOCAL_MACHINE\SYSTEM\CurrentControlSet\Services\CVirtA***
3. Find the String Value called ***DisplayName***
4. Right click and select ***Modify*** from the context menu.
5. In Value data, remove ***@oemX.inf,%CVirtA_Desc%;***. The Value data should only contain ***Cisco Systems VPN Adapter for 64-bit Windows***.
6. Click ***Ok***.
7. Close Registry Editor.
8. Retry your Cisco VPN Client connection.

OMG tried so many things to fix this , and after trying this step it actually worked. This actually happened to me just yesterday after I updated to the Windows 11 (yes, this fix also works for Win11) .. Thanks !
