Cisco VPN Client Windows 10 - 442 Error

Support Team - 2020-07-06 - 1 Comment - in Security

Cisco VPN on Windows 8.1/10 - Reason 442: Failed to enable Virtual Adapter

To fix:

1. Click Start and type **regedit** in the Search field and hit enter.
2. Navigate to **HKEY_LOCAL_MACHINE\SYSTEM\CurrentControlSet\Services\CVirtA**
3. Find the String Value called **DisplayName**
4. Right click and select **Modify** from the context menu.
5. In Value data, remove **@oemX.inf,%CVirtA_Desc%;**. The Value data should only contain **Cisco Systems VPN Adapter for 64-bit Windows.**
6. Click **Ok**.
7. Close Registry Editor.
8. Retry your Cisco VPN Client connection.

There are numerous VPN's in the market today, however, FastestVPN took the world by storm immediately after it was formed in 2017, with many users even remarking that FastestVPN is by far the best VPN for Kodi. However, still, others would agree that FastestVPN is by far the best VPN for Firestick TV users.
