

VNC Multiple Display Mapping

Support Team - 2024-05-10 - Comments (0) - Microsoft Windows

How do I map multiple VNC Viewer monitors to multiple VNC Server monitors?

It is possible to map a 1:1 relationship between multiple monitors on VNC Server and VNC Viewer, ie. VNC Server's monitor 1 displayed on VNC Viewer's monitor 1, VNC Server's monitor 2 displayed on VNC Viewer's monitor 2 and so on.

To do this:

- Check "Full screen mode" in VNC Viewer > Options > Advanced > Display
- Set "UseAllMonitors" to True in VNC Viewer > Options > Advanced > Expert tab.
