VNC Multiple Display Mapping

Support Team - 2018-01-25 - 0 Comments - in Microsoft Windows

How do I map multiple VNC Viewer monitors to multiple VNC Server monitors?

It is possible to map a 1:1 relationship between multiple monitors on VNC Server and VNC Viewer, ie. VNC Server's monitor 1 displayed on VNC Viewer's monitor 1, VNC Server's monitor 2 displayed on VNC Viewer's monitor 2 and so on. To do this:• Check "Full screen mode" in VNC Viewer > Options > Advanced > Display• Set "UseAllMonitors" to True in VNC Viewer > Options > Advanced > Expert tab.
